Huron Midwives is looking forward to adding a New Registrant to our supportive team of rural midwives in the 2025-26 fiscal year.

About us:

Our large catchment area is located along the beautiful Lake Huron coast. Our newly renovated clinic is in Blyth, and has two clinic birth suites, a community room, and three appointment rooms. We have a very high out-of-hospital birth rate, around 60%. We also all have good relationships at our three hospital sites- Stratford Hospital (level 2), AMGH Goderich (level 1) and SBGHC Walkerton (level 1). We are passionate about providing quality midwifery care and exceeding client care needs in this rural/remote community. We use Accuro EMR to improve management of client care in our rural/remote practice. We also have the demand to keep an NR on as a GR in future years if it is the right fit. We work with exceptional second attendants which means better work/life balance for midwives, and the NR will not be overwhelmed with births in the second role (still will get your 30 required).

Looking for a New Registrant who...

- Values supporting normal, non-intervention birth
- Has a passion for home/clinic births (NR caseload likely will be more than 50% out-of-hospital planned births)
- Wants to work in a supportive Primary call model (all of our midwives work in primary call, and we are very supportive to cover last minute time off, or switch weekends. We all get 2 months of the year off call, and the equivalent of two long weekends per month off. Since we all are in primary call, often clinic consists of only 1 clinic day and 1 home visit day/week.)
- Wants to work in a practice with transparent billing – when you discharge a client, you get paid the full amount from the ministry that month. If you attend a birth in the second role, you will get paid the second fee. We also use a visit tracking system, so that it balances the workload and every year the difference of the visit tracking is dispersed at 65 dollars/visit. As a rural/remote practice, you also will receive the highest travel disbursement in the province. We also distribute caseload variables in an equitable way that the midwives submit their hours of qualifying CVs and payment is distributed as a percentage of workload done.
- Has a keen interest in learning from and working with old order Amish and Mennonite families, and respectful of their cultural and religious beliefs.
- Interested in advancing their skills in foley insertions, ECVs, ultrasound assessments, and herbal/alternative medicine
- Values good interprofessional relationships and improving advocacy and quality care for clients in all birthplace settings
- Strives to keep documentation contemporaneous and communicates well

All interested New Registrants are encouraged to send their Curriculum Vitae to ellen@huronmidwives.ca. All interview candidates will be contacted March 29.
